# Discovered cloud storage

## Viewing your Amazon S3 buckets

After you install a Connector in AWS, BlueXP can automatically discover information about the Amazon S3 buckets that reside in the AWS account where the Connector is installed. An Amazon S3 working environment is added to the Canvas so you can view this information.

You can see details about your S3 buckets, including the region, access policy, account, total and used capacity, and more. These buckets can be used as destinations for Cloud Backup, Cloud Tiering, or Cloud Sync operations. Additionally, you can use Cloud Data Sense to scan these buckets.

### Steps

1. [Install a Connector](#) in the AWS account where you want to view your Amazon S3 buckets.
2. From the navigation menu, select **Storage > Canvas**.

You should automatically see an Amazon S3 working environment shortly after.

3. Click the working environment and select an action from the right pane.

4. Click **Sync data** to synchronize data to or from S3 buckets.

For more details, see [the overview for the Cloud Sync service](#).

5. Click **Enable** if you want Cloud Data Sense to scan the S3 buckets for personal and sensitive data.

For more details, see [Getting started with Cloud Data Sense for Amazon S3](#).

6. Click **Enter Working Environment** to view details about the S3 buckets in your AWS account.

Bucket Name	AWS Account	Region	Creation Date	Encryption	Is Public	Size	Total Objects

# Viewing your Azure Blob accounts

After you install a Connector in Azure, BlueXP can automatically discover information about the Azure storage accounts that reside in the Azure Subscriptions where the Connector is installed. An Azure Blob working environment is added to the Canvas so you can view this information.

You can see details about your Azure storage accounts, including the location, resource group, total and used capacity, and more. These accounts can be used as destinations for Cloud Backup, Cloud Tiering, or Cloud Sync operations.

## Steps

1. [Install a Connector](#) in the Azure account where you want to view your Azure storage accounts.
2. From the navigation menu, select **Storage > Canvas**.

You should automatically see an Azure Blob working environment shortly after.

3. Click the working environment and select an action from the right pane.

# Viewing your Google Cloud Storage buckets

After you install a Connector in Google Cloud, BlueXP can automatically discover information about the Google Cloud Storage buckets that reside in the Google account where the Connector is installed. A Google Cloud Storage working environment is added to the Canvas so you can view this information.

You can see details about your Google Cloud Storage buckets, including the location, access status, storage class, total and used capacity, and more. These buckets can be used as destinations for Cloud Backup, Cloud Tiering, or Cloud Sync operations.

## Steps

1. [Install a Connector](#) in the Google account where you want to view your Google Cloud Storage buckets.
2. From the navigation menu, select **Storage > Canvas**.

You should automatically see a Google Cloud Storage working environment shortly after.

3. Click the working environment and select an action from the right pane.

4. Click **Sync data** to synchronize data to or from Google Cloud Storage buckets.

For more details, see [the overview for the Cloud Sync service](#).

5. Click **Enter Working Environment** to view details about the buckets in your Google account.
